0005	<p>The Medical Chart is not fully Scanned until the following information is provided.</p> <ul style="list-style-type: none"> • Patient ID • Account Number • Date of Birth • Date of Service • Discharge Date • Physician ID <p>This rule can be violated by presenting a warning and allowing the chart to be made available for coding.</p>	Action restricting	Dynamic	Business Policy

Column Key

Rule Definition: Business rules should be *atomic*: Each business rule should be stated at the finest level of granularity possible.

Type of Rule:

- **Structural facts** – Facts or conditions that must be true.
- **Action restricting** – Prohibiting one or more actions based on a condition.
- **Action triggering** – Instigating an action when one or more conditions become true.
- **Inferences** – Drawing a conclusion when one or more conditions become true.
- **Calculations** – Calculating one value given a set of other values.

Staic/Dynamic: Likelihood of change in the future.

NewCo-Med – Business Rules Catalog

Source: Where the business rule came from. (eg: HIPPA Requirement, Business Policy, ...)

NOTE: Business rules relate to HOW the company operates; they do not relate to requirements of a specific application. A requirement is usually phrased, “The system shall”, whereas a business rule states, “The business works like this.”
